

Model R-TC

TRAILER / DOCK FAN

Model RTC truck fans recirculate air within semi-truck trailers to make the loading and unloading process cooler and more comfortable. This powerful, forward curved centrifugal blower pushes air throughout an entire 53' trailer.

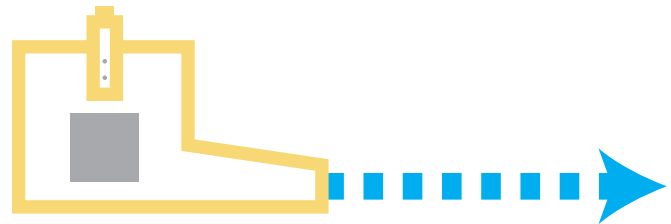

Only the blower nozzle extends into the truck bay, keeping the worker area free and minimizing damage to the unit.

PRODUCT BENEFITS

- High speed air flow to increase productivity during loading and unloading of trucks and trailers.
- Reduce heat in the trailer dry box to improve worker health & safety.
- Ideal for large semi-trailers. Pushes air up to 150 ft long.
- Redirect smoke, fumes, and exhaust from forklifts and trucks.
- Minimum obstruction in the curtain to allow workers and forklifts to maneuver.

HOW IT WORKS

The powerful fans push cool air deep into the trailer, up to 150 feet, at the ceiling. This forces the hot air to evacuate at the floor level, away from where the workers feel it.

Sends a powerful jet of air deep into a truck bed.

PRODUCT RANGE

Model	Distance	Height	Depth	Approx Weight
R-TC	55 ft	16"	16"	137 lbs

STANDARD FEATURES

- 14" Diameter Propeller,
- 3/4 HP Direct Drive Motor, 1075 RPM
- Galvanized sheet housing with caution yellow finish (custom colors available).
- OSHA compliant fan guards included.
- 12 ft, 155V plug cable included.

OPTIONAL FEATURES

- Voltage Options:
 - 1 Phase 115/230V, 5.4/2.7 AMPS
 - 1 Phase 277V, 2.1 AMPS
 - 3 Phase 230/460V, 1.4/0.7 AMPS
